

i-supply
for Colourful Supplies...

I-supply graphics solutions is a company dedicated to creating what our clients want in design, production & installation of signage & displays specialising in retail branding and promotion signages.

Working with Architects & designers as channel partners, Vision can work with your designs or create totally original concepts to communicate the clients brands & ideas. We will offer advice on the types of materials available & the options on bespoke concepts.

Established in 2008, we have established a reputation for innovative designs that we will also produce & install.

What we do!

Completely transform your shop, office, canteen, study area by choosing the right image, design or pattern. You can create an exciting inspirational environment or a more out area.

Create a festive look to your store to support promotions like Sale, Special offer, Bonanza.

Add an elegant look by implementing season visual and themes.

Why use I-supply?

- We do everything in house from design & production to installation keeping total control of the whole process.*
- Consult with our designers to discuss creative options and we can suggest ideas. Visions designers will inform you of the options available in terms of materials & what's possible to produce.*
- Mutoh Japan printers create high resolution prints ensuring quality.
Eco friendly odourless prints are perfect for home, office , hospitals & restaurants where low quality Chinese printing is not an option*
- Our team has completed large projects on time & on budget for
Landmark group, Al shaya, Al sabriya Sharaf retail, Tamdeen Group, ABC, Reebok to name a few.*

Powered with

Wall Graphics

The most important part of the process is the designing of the concept to be displayed on the wall space. Our designers will create original works or work with your designs. I-supply graphics will then advise on the many types of material that can be used on the final product. The following pages discuss the materials that are used regularly

Technical Highlights

- The images are digitally printed at 1200 dpi to create very realistic pictures.*
- Environmentally friendly eco solvent inks are Green guard*
- Up to 5 years display performance indoors and up to 3 years in outdoors*
- Wide variety of textured and smooth wallpaper fabrics, self adhesive vinyl.*

Printed Self Adhesive Vinyl

In high traffic areas the combination of a strong adhesive vinyl with a laminate ensures that there are no frayed edges or peeling.

The laminate ensures robust protection against scratching, cleaning, fading

Any image design or pattern can be reproduced to give your environment

Transform a boring wall into a strong feature with vibrant colours printed from high resolution digital printing.

Glass Art

Printed Frosted Film

Using the digital process with different transparent & opaque films a wide variety of effects can be achieved. These images show that with lower intensity internal lighting the images & colours are highlighted by the stronger external light. Transform an unsightly view into a work of art and create privacy simultaneously.

Cut out Etched Film

Health & safety regulations require markings on glass to prevent accidents. Typically these markings are squares or dots but these images illustrate that with a little imagination the glass can be enhanced by more creative designs. Using high speed precision plotters we can create even the most intricate pattern or design to create a feature on the glass

Promotional Signs

Danglers

Danglers are normally self adhesive vinyl pasted on forex / foam sheet and hanging from cling on any shape.

Security antenna covers

One of the most effective and attractive area to advertise promotions

Hanging Banners

Shelf Strips, Tent Cards,

Light box

Vinyl Glass panels

Shop - in-store branding

We implement the graphics products such as wall boards, backlit boxes upright graphics, display windows and help the visual merchandiser to produce props as per the brand guidelines

Vehicle Graphics

Full Colour Digital Print (Full body wrap)

Vehicle wraps are cost effective high impact tool for advertising.

The impact of a full vehicle wrap, that will get-seen by a thousand people each day for the next three years works out a fraction of the cost of yellow pages adverts.

Coloured Vinyl Wrap (Cut Graphics wrap)

Is the least expensive material for applying to vehicles. Applied directly to your vehicle, this will give you a weather resistant advert on the move. Our ranges of vinyl will last from 6 months to 8 years.

Banners, building wraps & flags

Digitally printed banners & building wraps are a low cost form of outdoor advertising. Vision design & produce all types of promotional banners in pvc & mesh material. Our experienced fitters can install the banners using our heists & access equipment.

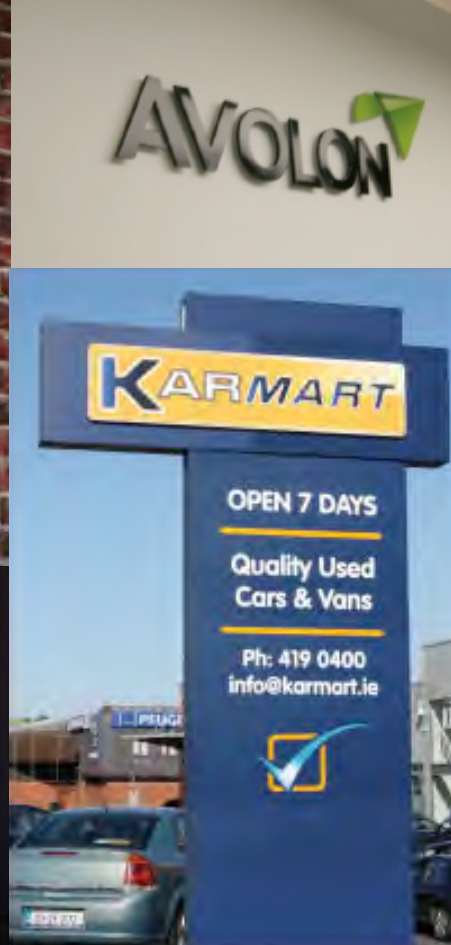

Flags are an effective way to advertise your products. We can print your logo or design for exhibitions, promotional events & sales.

We provide flags and flag poles and we will also install flag pole systems for larger projects.

Feather flags and free standing flag systems are effective for both indoor & outdoor displays.

External Signage & internal signage

Types of external signage

A: Raised lettering: Choose from raised lettering with back lit led's to create a halo glow effect to ad impact at night.

B: Routed letters: We routed the letters from 20 mm thick pvc plastic that's then sprayed to the required colours.

C: Metal Signs: Using a combination of built up chrome lettering with rear lit blue led lights we design and manufacture logos for external & internal signage at showrooms.

D: Light-boxes: digitally printed on banners stretched over a aluminium frame housing the lighting is called a lightbox. The images can be changed regularly at a very economical cost.

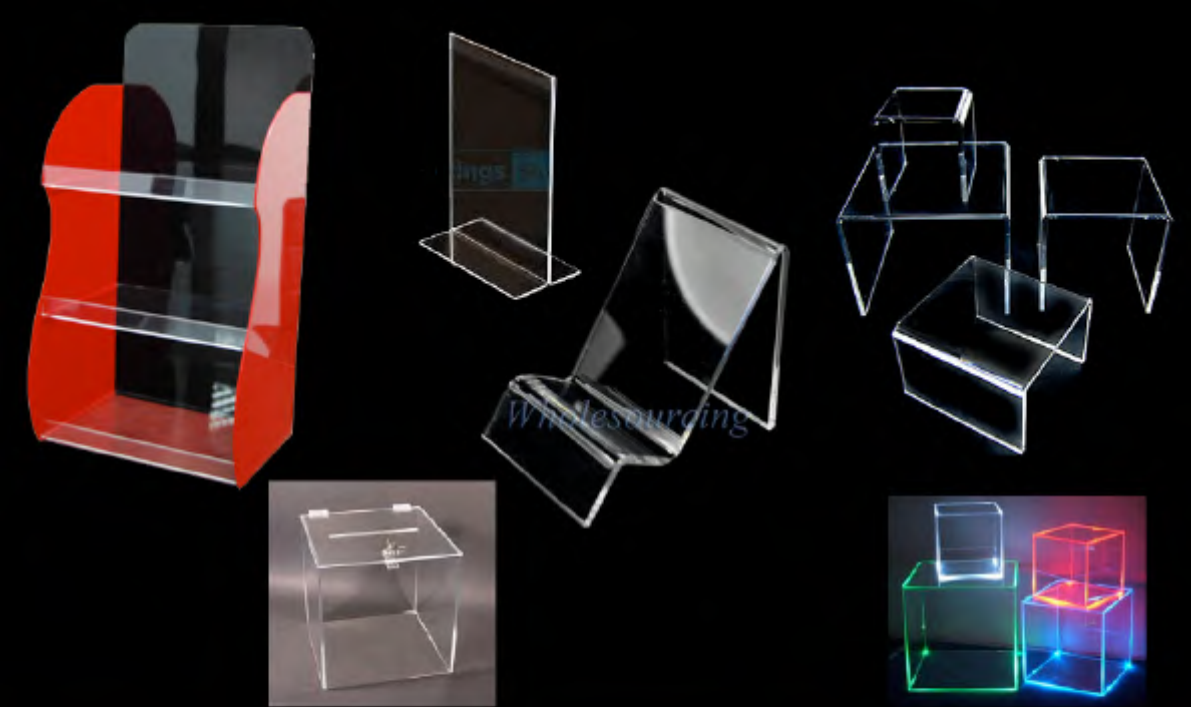

Acrylic stands and other display props

Acrylic Stands:

Acrylic Stands are commonly used for price points and talkers, we have a range of acrylic which starts from 1mm to 20mm with various colours, our high quality machines provides a precision cutting and meets the highest standers in the market.

MDF Boxes:

MDF boxes can be made in different thickness stand from 12 mm to 22mm with or with out painting as per the requirements. Mdf boxes are mainly used for product display and podiums

Indoor & outdoor LED Display

LED Display stands:

Led display stands are slim lightbox made with LED, acrylic sheet and duratrans films for display, it has a digital panel where we can run the promotion or text.

Walking Bill Boards:

Walking billboards are the mobile unit of LED display stand with a back pack.

LED Billboards:

LED billboards are the huge led board constructed on a uni-pole for advertising.
